DJI
Zenmuse L2

The Zenmuse L2 combines LiDAR, a high-precision IMU system, and a quality RGB camera, enhancing DJI drones for more accurate and efficient geospatial data capture. When used with DJI Terra, it simplifies 3D data collection and precise post-processing.

With powerful hardware support, the L2 enables detailed scanning of complex objects over a wide range and faster point cloud generation. During operations, users can review and process point cloud models on-site, aided by DJI Terra's Task Quality Reports.

Technical Specifications

Aircraft

Dimensions	:155x128x176 mm (LxWxH)
Weight	: 906 g
IP rating	: IP54
Compatible UAV	: M300 RTK, M350 RTK

LiDAR

Ranging accuracy	: 2 cm @150 m
Max. returns supported	: 5
Min. detection range	: 3 m
Laser wavelength	: 905 nm

System Performance

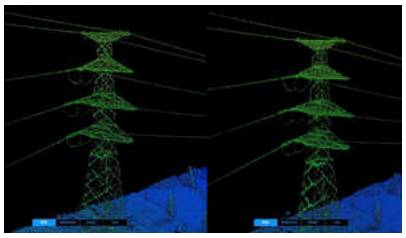

Detection range	: 450 m @50% reflectivity, 0 klx 250 m @10% reflectivity, 100 klx
Point cloud rate	: Single return: 240,000 pts/s Multiple returns: 1,200,000 pts/s
System accuracy	: H: 5 cm @150 m V: 4 cm @ 150 m

Others

Sensor	: 4/3 CMOS, 20MP
Stabilization system	: 3-axis (tilt, roll, pan)
Mounting	: Detachable DJI Skyport
Post processing	: DJI Terra

Frame-based LiDAR

The L2 can detect objects ranging from 250 meters at 10% reflectivity and 100 klx to 450 meters at 50% reflectivity and 0 klx, thanks to its reduced spot size, making it capable of capturing smaller objects with finer details, penetrating denser vegetation for more accurate digital elevation models (DEM), all supported by an effective point cloud data rate of up to 100% and enhanced surveying possibilities through a three-axis gimbal in its frame-based design.

Smaller laser spots,
denser point clouds

2.5 km²
area covered in a single flight

ABOUT US

Terra Drone is one of the biggest drone service providers in the world offering cutting-edge solutions for aerial survey, infrastructure inspection, data analysis, etc. Terra Drone is headquartered in Japan and has presence in all parts of the world through its partner network of group companies and technology collaborators.

NDT Corrosion Control Services Co. (NDTCCS) was established in 1975, with Head Office in Dammam, Kingdom of Saudi Arabia with branches in other GCC countries. NDTCCS offer our services all over in the GCC with man power strength of around Three Thousand plus (3,000+) technicians & inspectors.

Collaboration between Terra Drone & NDTCCS has been started since 2019. By combining the strong presence of NDTCCS in the region with the innovative drone technology & solution that Terra Drone possesses, the partnership was aimed to introduce drone technology as an innovative solution to many inspection challenges being present in the region. Since then, several initiatives have been carried out to promote the solution, especially in Abu Dhabi (UAE).

TERRA DRONE CORPORATION
