Elios 3 + UT Payload

Relying on the power of computer vision and LiDAR mapping, Elios 3 is a versatile indoor drone opening doors to a world where performing systematic inspections does not require months of training, reporting is done intuitively on a 3D model of your asset, and situational awareness is built into the piloting app.

The Elios 3 drone's advanced SLAM-based stabilization keeps it incredibly steady in tough conditions, making it easy for pilots of any skill level to perform complex missions with minimal training.

FLYABILITY

Elios 3

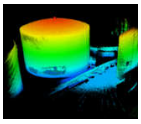

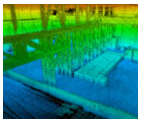

Technical Specifications

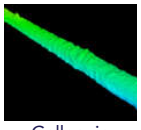

Aircraft

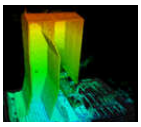

Net weight	: 620 g
Max. flight time	: up to 9 mins (with LiDAR)
Wind resistance	: 5 m/s (assist mode)
LiDAR sensor	: Ouster OS0-32 beams sensor
Material	: Carbon fiber, composites
Ingress protection	: IP 44
Video resolutions	: 4k ultra HD 3840 x 2160 at 30fps

Applications

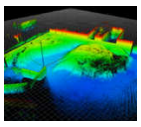

Storage tank

Warehouse

Gallery in underground mine

Boiler

Building facade

Indoor stockpile

Flawless Locational Awareness

Integrated with the GeoSLAM software suite, Elios 3's LiDAR data can be processed to build survey-grade 3D models of your asset, enabling surveyors to map the truly inaccessible.

The embedded LiDAR constantly scans the surroundings to build a high-density point cloud map. This map is displayed instantly in the Cockpit App, empowering pilots with exceptional locational awareness. A real-time 3D view of the drone's trajectory and environment provides crucial data.

NDTCCS

ABOUT US

Terra Drone is one of the biggest drone service providers in the world offering cutting-edge solutions for aerial survey, infrastructure inspection, data analysis, etc. Terra Drone is headquartered in Japan and has presence in all parts of the world through its partner network of group companies and technology collaborators.

NDT Corrosion Control Services Co. (NDTCCS) was established in 1975, with Head Office in Dammam, Kingdom of Saudi Arabia with branches in other GCC countries. NDTCCS offer our services all over in the GCC with man power strength of around Three Thousand plus (3,000+) technicians & inspectors.

Collaboration between Terra Drone & NDTCCS has been started since 2019. By combining the strong presence of NDTCCS in the region with the innovative drone technology & solution that Terra Drone possesses, the partnership was aimed to introduce drone technology as an innovative solution to many inspection challenges being present in the region. Since then, several initiatives have been carried out to promote the solution, especially in Abu Dhabi (UAE).
