Nolvis X1

Nolvis X1 is a compact drone designed for confined space inspection in narrow, dark, and GPS denied environments. Featuring a 4K inspection grade camera and LiDAR based stabilization, X1 delivers stable flight and clear visual data even in complex indoor spaces.

With access through openings as small as 16 inches, X1 enables inspections of tanks, boilers, vessels, shafts, and other confined areas without putting personnel inside. The onboard LiDAR also captures 3D point cloud data, providing additional spatial context for inspection and assessment.

Precision and stability for confined space inspection.

Technical Specifications

Aircraft

Weight (Including Battery)	: 1800 g
Dimension	: 360 x 310 x 210 mm
Maximum Flight Time	: 10 min
Wind Resistance	: 3 m/s
Cage Class	: 14 inch
Smallest Opening	: 16 inch (40 cm)
Max Flight Speed	: 2.5 m/s
Operating Temperature	: 0°C - 45°C
Operating Frequency	: 2.4 GHz ISM

Camera

Video Resolution	: 4K (3840x2160)
Light Output	: 10.480 lumen (Max)
Camera Sensor	: 1/1.7-inch, 8 MP

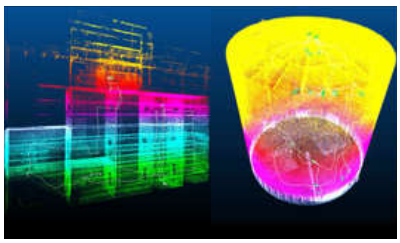

LiDAR

Laser Safety	: Class 1
Range	: 40 m @ 10% reflectivity / 40 m @ 80% reflectivity
Range Accuracy	: 2 cm @ 10 m
Frame Rate	: 10 Hz
Point Rate	: 200.000 points/s
Deliverable	: 3D point cloud .las)
Flight Stabilization	: LiDAR-based (GPS-free)

Unmatched Access for Confined Space Inspection

Nolvis X1 is designed to access narrow and confined spaces where conventional inspection drones cannot operate. Its compact 14 inch class cage can pass through openings as small as 16 inches, allowing inspections inside tanks, boilers, vessels, shafts, and other industrial assets without requiring personnel to enter the space.

Its LiDAR based stabilization maintains steady flight even in GPS denied environments, while the 4K inspection camera and high intensity illumination provide clear visual data in dark interiors.

Designed for inspection of ballast tanks, cargo tanks, storage tanks, pressure vessels, columns, and boilers.

ABOUT US

Terra Drone is one of the biggest drone service providers in the world offering cutting-edge solutions for aerial survey, infrastructure inspection, data analysis, etc. Terra Drone is headquartered in Japan and has presence in all parts of the world through its partner network of group companies and technology collaborators.

NDT Corrosion Control Services Co. (NDTCCS) was established in 1975, with Head Office in Dammam, Kingdom of Saudi Arabia with branches in other GCC countries. NDTCCS offer our services all over in the GCC with man power strength of around Three Thousand plus (3,000+) technicians & inspectors.

Collaboration between Terra Drone & NDTCCS has been started since 2019. By combining the strong presence of NDTCCS in the region with the innovative drone technology & solution that Terra Drone possesses, the partnership was aimed to introduce drone technology as an innovative solution to many inspection challenges being present in the region. Since then, several initiatives have been carried out to promote the solution, especially in Abu Dhabi (UAE).
