Trinity Pro

The Trinity Pro offers long-range coverage with up to 90 minutes of flight time, enabling data collection over large areas in a single flight. It is built for rugged use across industries such as agriculture, forestry, mining, and construction. Trinity Pro ensures high-quality data output, minimized downtime, and simplified workflows. With its vertical take-off and landing (VTOL) capability, it operates easily in challenging environments, while the modular payload system allows flexible sensor integration for various applications.

Technical Specifications

Aircraft

Max. take-off weight	: 5.750 g
Max. payload weight	: 1000 g
Max. flight time	: 90 min
Area coverage	: 700 ha
Max. take-off altitude (above MSL)	: 4800 m
Max. flight altitude	: 5500 m
Wind resistance	: 12 m/s

Cutting Edge Safety Features

Quantum Systems Trinity Pro has been integrated with a mini LiDAR, which aims to detect obstacles in the landing zone area. This feature can detect potential risks during mission planning and before take-off, reducing the risk of an adverse event during flight. The user can create application-specific reports and analyses without having to spend time establishing new and complicated processes.

ABOUT US

Terra Drone is one of the biggest drone service providers in the world offering cutting-edge solutions for aerial survey, infrastructure inspection, data analysis, etc. Terra Drone is headquartered in Japan and has presence in all parts of the world through its partner network of group companies and technology collaborators.

NDT Corrosion Control Services Co. (NDTCCS) was established in 1975, with Head Office in Dammam, Kingdom of Saudi Arabia with branches in other GCC countries. NDTCCS offer our services all over in the GCC with man power strength of around Three Thousand plus (3,000+) technicians & inspectors.

Collaboration between Terra Drone & NDTCCS has been started since 2019. By combining the strong presence of NDTCCS in the region with the innovative drone technology & solution that Terra Drone possesses, the partnership was aimed to introduce drone technology as an innovative solution to many inspection challenges being present in the region. Since then, several initiatives have been carried out to promote the solution, especially in Abu Dhabi (UAE).
