Voliro T

The Voliro T is a next-generation flying robot that redefines drone inspection with its unique 6-DoF (Degrees of Freedom) omnidirectional capabilities. Built specifically for contact-based inspection tasks, it enables safe, precise, and efficient interaction with complex industrial assets.

Designed for industries such as oil & gas, power generation, and infrastructure, the Voliro T excels in ultrasonic thickness measurements, visual inspection, and NDT (Non-Destructive Testing) in hard-to-reach or hazardous environments. Equipped with a robust carbon fiber frame, advanced stabilization systems, and seamless integration with professional sensors, Voliro T offers unmatched stability during physical contact—even on vertical or inclined surfaces.

Technical Specifications

Aircraft

Weight (batteries exclude)	: 3700 g
Max Take-off Weight	: 6000 g
Flight Time	: 10 - 14 min
Max Payload	: 1000 g
Max Wind Speed Resistance	: 12 m/s
Max Wind During Interaction	: 8 m/s
Max Altitude	: 5000 m
Operating Temperature	: -10°C to 40°C
Dimensions (LxWxH)	: 118 x 109 x 34 cm
Max Horizontal Speed	: 3 m/s
Max Ascent / Descent Speed	: 3 m/s
Max Transmission Distance	: 3000+ m

Battery

Battery configuration	: 2 x 6S batteries in parallel
Capacity	: 2 x 4500 mAh
Weight	: 1.3 kg

Next-Level Industrial Inspections

The Voliro T integrates seamlessly with advanced control software, allowing operators to conduct real-time inspections, monitor sensor data, and perform precise maneuvers through an intuitive interface. This streamlined system eliminates the need for scaffolding, rope access, or manual measurements enabling fast, contact-based inspection of hard-to-reach assets.

Whether during critical shutdowns, routine maintenance, or inspections in hazardous environments, the Voliro T makes industrial inspections safer, faster, and more reliable transforming how professionals access and assess vertical and complex structures.

Extreme Mobility
Tilt +- 90°

360-Degree Freedom of Movement and Superior Stability

Rugged in any weather, precisely navigated even without GPS.

User-friendly interface for easy operation.

Modular payload system, allowing interchangeable payloads.

NDTCCS

ABOUT US

Terra Drone is one of the biggest drone service providers in the world offering cutting-edge solutions for aerial survey, infrastructure inspection, data analysis, etc. Terra Drone is headquartered in Japan and has presence in all parts of the world through its partner network of group companies and technology collaborators.

NDT Corrosion Control Services Co. (NDTCCS) was established in 1975, with Head Office in Dammam, Kingdom of Saudi Arabia with branches in other GCC countries. NDTCCS offer our services all over in the GCC with man power strength of around Three Thousand plus (3,000+) technicians & inspectors.

Collaboration between Terra Drone & NDTCCS has been started since 2019. By combining the strong presence of NDTCCS in the region with the innovative drone technology & solution that Terra Drone possesses, the partnership was aimed to introduce drone technology as an innovative solution to many inspection challenges being present in the region. Since then, several initiatives have been carried out to promote the solution, especially in Abu Dhabi (UAE).
